NEGAR. ESFAHAN

①

$$\begin{pmatrix} 1 & 0 & 0 & 0 & 1 & 0 & 0 \\ \gamma & \epsilon & \gamma & \gamma & \gamma & \epsilon & \gamma & \gamma \end{pmatrix} = (4\Lambda)_1$$

$$4\epsilon + \epsilon = 4\Lambda$$

②

$$\begin{pmatrix} 1 & 1 & 1 & 1 & 0 & 0 & 1 \\ \gamma & \epsilon & \gamma & \gamma & \gamma & \epsilon & \gamma & \gamma \end{pmatrix} = (121)_1$$

④

$$\begin{pmatrix} 1 & 1 & 1 & 0 & 1 & 1 & 0 \\ \gamma & \epsilon & \gamma & \gamma & \gamma & \epsilon & \gamma & \gamma \end{pmatrix} = (11\Lambda)_1$$

$$\gamma + \epsilon + 1\epsilon + \gamma\gamma + \epsilon\epsilon = 11\Lambda$$

⑤

$$\begin{pmatrix} 1 & 1 & 0 & 1 & 0 & 1 & 1 \\ \gamma & \epsilon & \gamma & \gamma & \gamma & \epsilon & \gamma & \gamma \end{pmatrix} = (1\epsilon V)_1$$

③

$$\begin{pmatrix} 1 & 1 & 1 & 0 & 0 & 1 & 1 \\ \gamma & \epsilon & \gamma & \gamma & \gamma & \epsilon & \gamma & \gamma \end{pmatrix} = (11\epsilon)_1$$

$$1 + \gamma + 1\epsilon + \gamma\gamma + \epsilon\epsilon = 11\epsilon$$
